

Who will I contact for new projects?

The existing sales channels remain in place. Contact the same sales people, representatives or distributors that you work with today.

What differentiates Siemens Water Technologies from other companies?

No other company has the range of products, technologies and services for water treatment – across all markets and around the globe.

What other Siemens businesses offer technologies that can be used in the water market?

Siemens companies provide automation and drives for water treatment, financial services for project funding, security systems, and more. Visit www.siemens.com to learn more about Siemens' businesses and portfolio of products.

SG Water is Changing its
Name to Siemens

Water Technologies

SIEMENS

In April, 2010, SG Water will change its name to Siemens. The Siemens name is one of the strongest in the world, with a history of innovation and engineering excellence that goes back over 150 years.

Together, our combined experience and innovation in water technology provides an unparalleled, expanded product portfolio, customized solutions, and superior technical expertise in water purification.

Taking care of our customers globally is our number one priority. Our name is changing, but not our dedication to customer satisfaction, our entrepreneurial spirit and our commitment to providing the highest quality products and services you have come to know and expect from our company.

This material is designed to answer questions you may have about SG Water, Siemens Water Technologies, and the company's overall offering.

Questions and Answers

Who is Siemens Water Technologies?

Siemens Water Technologies provides water and wastewater treatment and service solutions to municipal, industrial, commercial, and institutional customers globally, with more than 6,000 employees at 179 locations worldwide. Siemens Water Technologies has over 200,000 technology and service installations around the world. Headquarters are located in Warrendale, Pennsylvania USA.

What does this mean to me?

SG Water's technologies, services and people will remain the same. Siemens Water Technologies will provide customers with the access to more water treatment solutions, as well as the financial strength, innovation and reliability of Siemens.

What changes will I see with this transition?

A change in our name and logo; the SG Water name will go away and be replaced by Siemens in April 2010. Rest assured that the people, products and services are the same – only the name on the shirt and truck will be changing. The people you have been accustomed to working with at SG Water are still eager to work with you.

What about parts, service and existing projects?

There's no change to any of these. You can continue to receive parts and service from your contacts at SG Water. SG Water projects continue as normal working with the same qualified team of engineers, sales staff, and customer support representatives.
