

Centramax™ Centrifuge Maintenance Schedule

Have you checked your centrifuge lately?

The owner's manual that you received with your centrifuge recommends checking it regularly to keep it in its best condition. Here's what you should be checking for:

DAILY

- ___ Observe noise.
- ___ Observe vibration.
- ___ Observe temperature of hydraulic system.
- ___ Observe power consumption.

WEEKLY (or every 150 hours)

- ___ Check motors for cleanliness.

MONTHLY (or every 500 hours)

Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec

- Grease bearings.
- Check V-belt tension.

YEARLY (or 8,000 hours)

Date: _____

- Inspect unit for erosion.
- Replace elastomers.
- Check vibration isolators.

TIP: Make copies of this page to check off each day.

For more information, consult your O&M manual. If you have any questions or need any help with parts or service, please call Siemens Water Technologies toll free at 1-800-245-3006. We can provide you with all your parts and offer Service Contracts to assist you.
