

Hydroblasting

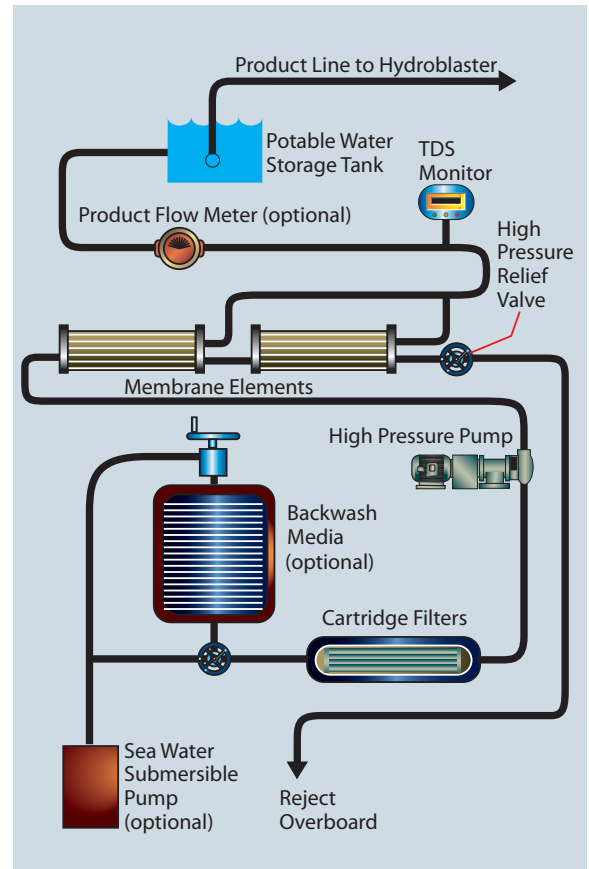

Hydroblasting has become a viable alternative to current sandblasting methodology as it relates to surface preparation on offshore facilities. The number and diversity of water blasting applications are virtually limitless in the exploration and production sector. When certain applications are combined with our reverse osmosis systems, customers can save hundreds of thousands of dollars in transportation costs, and purchase of aggregate and disposal costs.

Applications

- Industrial Cleaning
- Paint & Coatings Removal
- Surface Preparation
- Water Jet Cutting
- Oilfield & Pipe Yards
- Marine Shipyards
- Chemical & Petrochemical

We've learned from experience that each application is unique. Our engineers work with clients to determine the appropriate amount of water needed, keeping in mind the standards that have to be met to achieve the best surface preparation for coatings.

We can evaluate your needs and recommend a system to complete your cleaning job quickly and effectively to reduce downtime to an absolute minimum. Contact one of our experts today.
