

# Custom Control Panels

## General Description

Siemens Water Technologies is your source for integrated control panel for custom or standard equipment applications. Our engineers and UL 508 compliant panel building facility can design and build custom built electrical control panels to meet your water treatment control requirements.

From complex PLC-based control schemes to simple auto-manual control, our engineers and staff can create one-of-a-kind or standard panels to the highest quality and standards. Whether the application requires communications, monitoring and control or specific materials of construction, our experience and expertise ensures your requirements are met. In addition, professional engineering drawings are available with each custom or standard panel.
